

Email Protection

Efficient protection against spam & viruses for corporate email

Centium Email Protection provides efficient safeguards against spam and secures continuity in your business email communication

Key Features

- Stop unwanted emails before they reach your companies IT Infrastructure
- Market leading detection rates against spam & known viruses
- 24/7 managed service
- Minimizes administration
- Deploys quickly and protects your entire organisation

Centium email Protection provides unmatched filtering levels against spam and viruses. We detect, mitigate, and block unwanted content for your companies email.

Our solution provide an efficient line of detection & filtering at the email gateway, with an array of scanning systems that protect your companies IT environment:

Botnet Secure: A series of checks and IP reputation scans ensures that any email, both inbound as outbound, which is generated by botnets, are efficiently detected and stopped. Botnet secure is further strengthened by numerous live feeds of detected botnets from your threat intelligence partners.

Spam Secure: We utilize market leading anti spam engines coupled with an array of our own advanced scanning mechanisms and algorithms. Normal emails are delivered to the inbox while spam emails are quarantined. Each user can access their quarantined emails by a personal quarantine report, while the administrator can manage if, and which type of emails the users can recover from quarantine.

Malware Secure: Each email is scanned with a minimum of three different antimalware engines, then it is inspected by our own malware inspector, where the final verdict is made for the email. Our advanced attachment filter also counteracts any exploits, utilizing file header or parser manipulation.

STOP SPAM BEFORE THEY REACH THE INBOX

Centium provides your organization with efficient solution against spam. Complete absence of spam with no, or very few false positives, enables your organization to reach maximum efficiency, without the overhead of spam or missing emails.

REGULATE ATTACHMENTS AND CONTENT EFFICIENTLY

Centium email Protection is designed to efficiently regulate attachments and unwanted content. Many existing email antispam and antivirus solutions are too easily bypassed by malware, through file header or parser manipulation. Centium email Protection is from the very beginning designed to counteract these types of exploits, while adding better security against malware and exploits to your organizations IT security layers.

24/7 MANAGED SERVICE AND THREAT PROTECTION

We constantly monitor and maintain Centium email Protection, providing enterprise grade availability and diligent detection levels for even the largest of corporations.

As an option our clients can take advantage of our 24/7/365 client security operations center.

We incorporate insight from CSIS Threat Intelligence, the fastest responding and most accurate source of threat intelligence in the market.

Administrators can easily search for any emails, while all data is displayed in realtime

Users can automatically receive a personal quarantine report when emails are blocked by Centium email Protection

Centium by CSIS Security Group A/S

Founded in Copenhagen in 2003, CSIS Security Group is a leading independent provider of cyber security services in Europe. Credited by Gartner Group for its threat intelligence capabilities, the company mitigates customers' security risk with a range of preventive security products and services, as well as with incident response and managed security services. CSIS is the preferred cyber security provider to some of the world's largest enterprise organisations, and is a trusted advisor to law enforcement agencies, government and financial sector.

MINIMIZES ADMINISTRATION

Centium email Protection provides administrators a web-based and intuitive dashboard that displays data at overall, threat, and user levels to help you prioritize any alerts and take action. Email logging & associated data are provided to you in real time. Alarms & notifications for spam-, virus & operational status can be received as SMS and email messages.

DEPLOYS QUICKLY AND PROTECTS YOUR ENTIRE ORGANISATION

To protect your employees, data, and productivity, today's defenses for email must provide efficient measures against spam unwanted content and viruses. Centium email Protections architecture enables you to deploy quickly and derive value immediately. You can protect your organization in hours — not days or weeks.

Our solution protects users on any network or device, regardless of where and how they check their corporate email. As a cloud based security service It is easily configured. Centium also uses the cloud to instantly update our systems every day to instantly incorporate new features and help you stay ahead of spammers.

Our services are operated in highly secure, certified, premium grade datacenters.
