

A1 Email Archiving

Improved compliance, e-discovery, and productivity

Email touches every link on your company's value chain, and the value of this content is immeasurable. Unfortunately the costs and burdens of email archiving – especially using legacy, premises-based systems – can spiral out of control.

Organizations need a solution that delivers security, integrity, scalability, and simplified management. Mimecast Email Archiving offers a true, cloud-based SaaS solution with the integrity and robust features needed to meet the most demanding information management needs. Recognized as a “Leader” in the 2015 Gartner Magic Quadrant for Enterprise Information Archiving, and a “Top Player” for Archiving in the Radicati Group’s 2016 Information Archiving Market Quadrant, Mimecast offers comprehensive email archiving to serve both corporate governance and employee productivity goals.

Comprehensive Archiving in the Cloud

Using multiple collection points – including the journal, gateway and synchronization technologies – Mimecast retains the original email, detailed metadata (including email recipients and delivery date and time), and a copy of the email if it was changed by company policy enforcement. Flexible e-discovery tools let administrators respond quickly to litigation or other requests. With Mimecast Email Archiving, organizations benefit from an independent, verifiable long-term repository that meets best practices for information governance. Email content is protected against human error, malice, or technical failure, whether hosted in the cloud or on premise.

KEY BENEFITS:

- Instant protection for valuable intellectual property assets.
- Comprehensive regulatory, e-discovery and litigation support through compliance-driven chains of custody and fully indexed archive for rapid search.
- Seamless migration of live and archived email data to Office 365 and other cloud environments.
- Reduced cost and complexity through a single cloud platform and an intuitive, unified administrative console.
- User empowerment via an Outlook® add-in, Mac app and mobile apps for iPhone®, iPad®, Android®, Windows Phone® and BlackBerry® devices.
- ISO 27001 and ISO 27018 Certification (global), SOC 2 Type 1 Attestation (US), and HIPAA Compliance attestation (US and UK).

Central Control, Security & Governance

Administrators control email retention policies, with three encrypted copies stored in separate locations. Granular litigation hold, e-discovery and reporting capabilities help support compliance.

- Active directory sync
- Recovery

Employee Enablement

Mimecast Email Archiving boosts employee productivity by giving them direct access to their email archives. All inbound, outbound and internal email is available for instant searching from any device with an industry-leading 7-second SLA. This functionality gives employees the means to find agreements, attachments, and other vital email content themselves, increasing their productivity without burdening the IT helpdesk.

Integrated Security and Continuity

The Mimecast Email Archiving service is architected on a single, purpose-built cloud platform that also enables Mimecast email security and continuity services. Mimecast's integrated services deliver compelling benefits including robust security and 100% availability, even when primary email systems are unavailable. Mimecast enables organizations to fully leverage the cloud's cost and scalability advantages without compromising control or security.

"Mimecast saves us a great deal of time, particularly when it comes to responding to requests to locate specific emails. We used to take hours or sometimes even days to respond—now we have the answer in just minutes."

— **Memorial Hospital of Converse County**

"Before Mimecast, our cost estimates for many searches were in the \$4,000-5,000 range. Now all requests are fulfilled for free."

— **Florida Pasco County**

Make Email Safer for Business

Mimecast integrated service bundles deliver the ultimate in cyber security, resiliency and archiving. Get comprehensive risk management or address specific requirements - all in a single platform.
